

Heavy-duty three-point grippers HGDT

Heavy-duty three-point grippers HGDT

Key features

At a glance

The force generated by the linear motion is translated into the gripper jaw movement via a force-guided triple wedge mechanism. This also guarantees synchronous movement of the gripper jaw. The virtually backlash-free slideway is realised using ground-in gripper jaws.

A wide range of uses:

- Double-acting gripper
- Compression springs for supplementing or retaining gripper forces, or for use as a single-acting gripper with only one compressed air connection
- Suitable for external and internal gripping

Sealing air connection:

Compressed air flows past the gripper jaw when sealing air (max. 0.5 bar) is connected.

This prevents particles and soluble oil, etc. from entering the gripper jaw guides.

There are two variants available:

Standard – HGDT...

Stroke per gripper jaw:

3 ... 10 mm

Total gripping force:

207 ... 1728 N

High force – HGDT...-F

Stroke per gripper jaw:

1.5 ... 5 mm

Total gripping force:

411 ... 3372 N

- 1 Gripper jaw
- 2 Triple wedge mechanism
- 3 Slot for proximity sensor
- 4 Piston with magnet

-  - Note

Design software for gripper selection
 → www.festo.com

Wide range of supply ports

Direct from the front

- 1 Supply ports
- 2 O-rings

Via adapter plate from underneath

Mounting options

Direct mounting from above

- 3 Mounting screws
- 4 Centring pins or centring disc

Via adapter plate from underneath

-  - Note

These grippers are not suitable or are of limited suitability for the following application examples:

Not suitable for:

- Welding splashes

Of limited suitability for:

- Machining with sealing air possible
- Aggressive media only possible after consultation with Festo

Characteristic load values at the gripper jaws

The indicated permissible forces and torques apply to a single gripper jaw. They include the lever arm, additional applied loads due to the workpiece or external gripper fingers and acceleration forces occurring during movement.

The zero coordinate line (gripper finger point of rotation) must be taken into consideration for the calculation of torques.

Size		25	35	40	50	63
Max. permissible force F_z	[N]	350	400	800	1500	2500

Opening and closing times [ms] at 6 bar

Without external gripper fingers

With external gripper fingers

The indicated opening and closing times [ms] have been measured at room temperature at an operating pressure of 6 bar with horizontally mounted gripper without additional

gripper fingers. The grippers must be throttled for greater loads [g]. Opening and closing times must then be adjusted accordingly.

Size			25	35	40	50	63

Spring force F_S as a function of size, gripper jaw stroke l and gripper length x , per gripper finger

Gripping force retention for HGDT-...-G...

The spring forces F_S as a function of the gripper jaw stroke can be determined from the following graph.

Standard – HGDT-...

- HGDT-25-A-G...
- - - - - HGDT-35-A-G...
- · - · - HGDT-40-A-G...
- · - · - HGDT-50-A-G...
- - - - - HGDT-63-A-G...

High force – HGDT-...-F-...

- HGDT-25-A-F-G...
- - - - - HGDT-35-A-F-G...
- · - · - HGDT-40-A-F-G...
- · - · - HGDT-50-A-F-G...
- - - - - HGDT-63-A-F-G...

The lever arm x [mm] must be taken into consideration when determining the actual spring force F_{Stotal} .

The formulae for calculating the spring force are provided in the table below.

Size	F_{Stotal} , per gripper finger	
	Standard – HGDT-...	High force – HGDT-...-F
25	$-0.3 * x + 0.85 * F_S$	$-2.24 * x + 0.64 * F_S$
35	$-0.5 * x + 0.75 * F_S$	$-0.97 * x + 0.7 * F_S$
40	$-0.5 * x + 0.8 * F_S$	$-1.45 * x + 0.66 * F_S$
50	$-0.6 * x + 0.7 * F_S$	$-0.97 * x + 0.51 * F_S$
63	$-0.6 * x + 0.75 * F_S$	$-2.35 * x + 0.72 * F_S$

Determining the actual gripping forces F_{Gr} for HGDT-...-A-G1 and HGDT-...-A-G2 as a function of the application, per gripper finger

The three-point grippers with integrated spring type HGDT-...-G1 (opening gripping force retention) and HGDT-...-G2 (closing gripping force retention) can be used as:

- single-acting grippers

- grippers with supplementary gripping force and
- grippers with gripping force retention depending on the requirements.

In order to calculate the available gripping forces F_{Gr} (per gripper finger), the gripping force (F_{Grip}) and spring force (F_{Stotal}) must be combined accordingly.

Application forces per gripper finger

Single-acting

- Gripping with spring force:
 $F_{Gr} = F_{Stotal}$
- Gripping with pressure force:
 $F_{Gr} = F_{Grip} - F_{Stotal}$

Supplementary gripping force

- Gripping with pressure and spring force:
 $F_{Gr} = F_{Grip} + F_{Stotal}$

Gripping force retention

- Gripping with spring force:
 $F_{Gr} = F_{Stotal}$

Free of copper and PTFE
RoHS-compliant

Note

The kit includes the individual mounting interface as well as the necessary mounting material.

Permissible drive/gripper combinations with adapter kit						Download CAD data → www.festo.com

1) CRC2: Corrosion resistance class to Festo standard 940 070
Components with medium corrosion exposure. Externally visible components with significant decorative function in direct contact with normal industrial atmosphere or media such as coolants and lubricants.

Heavy-duty three-point grippers HGDT

Accessories

Gripper jaw blank BUB-HGDT
(scope of delivery: 3 pieces)

Material:
Wrought aluminium alloy
Free of copper and PTFE
