Key features

## Cable characteristics

The connecting cables NEBU can be configured and ordered using the modular system. This is done by defining a series of characteristics. These include:

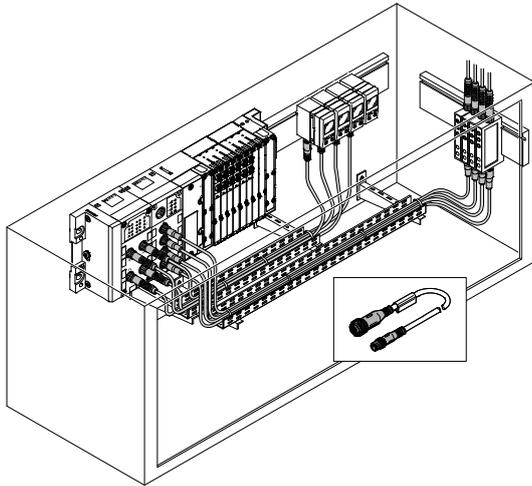

- Electrical connection
- Cable characteristics
- Length
- Number of pins/wires

The cable characteristics specify the resistance of the connecting cable to mechanical loads.

There are four quality classes:

- Basic
- Standard
- Suitable for use with energy chains
- Suitable for robot applications

## Cable characteristics: Basic

## Code P

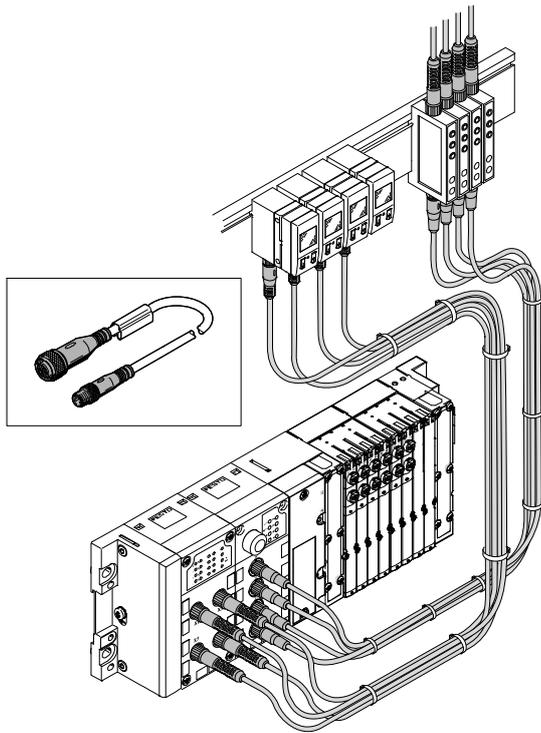

Basic applications are characterised by fixed cable installation with no mechanical loads.

The connecting cable is not continuously moving (kinked or twisted).

The cable sheath of the connecting cables is usually made from PVC.

- The resistance to bending of the connecting cable is tested in accordance with the Festo standard; the test conditions are available on request.

## Cable characteristics: Standard

## Code K

Standard applications are characterised by fixed cable installation or small to medium mechanical loads.

The connecting cable can even be used for simple energy chain applications with large radii.

The cable sheath of the connecting cables is made from polyurethane.

- The resistance to bending of the connecting cable is tested in accordance with the Festo standard; the test conditions are available on request.
- The connecting cable is tested for energy chains with 5 million cycles, bending radius 75 mm.

## Cable characteristics

Cable characteristics: Suitable for use with energy chains

Code E

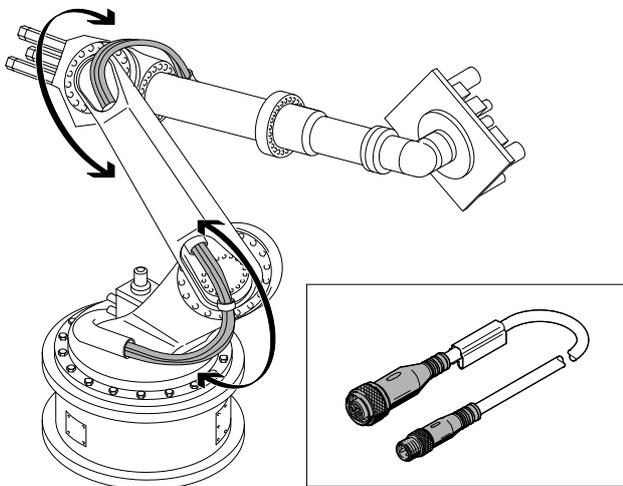

Energy chain applications involve high mechanical loads, particularly if the energy chains have small radii. It is possible that the connecting cable may be used in an environment where it is subject to continuous bending. The cable sheath of the connecting cables is made from polyurethane.

- The resistance to bending of the connecting cable is tested in accordance with the Festo standard; the test conditions are available on request.
- The connecting cable is tested for energy chains with 5 million cycles, bending radius 75 mm.
- The connecting cable is tested for energy chains with 5 million cycles, bending radius 28 mm.

Cable characteristics: Suitable for robot applications

Code R

Robot applications involve high mechanical loads, mainly caused by torsion. The cable sheath of the connecting cables is made from polyurethane and is halogen-free and oil-resistant.

- The resistance to bending of the connecting cable is tested in accordance with the Festo standard; the test conditions are available on request.
- The connecting cable is tested for energy chains with 5 million cycles, bending radius 75 mm.
- The connecting cable is tested for energy chains with 5 million cycles, bending radius 28 mm.
- The connecting cable is tested for torsional strength with more than 0.3 million cycles,  $\pm 270^\circ/0.1$  m.

## Connection technology types

Different types of plug connectors (e.g. angled or straight) can be chosen for the connecting cables.

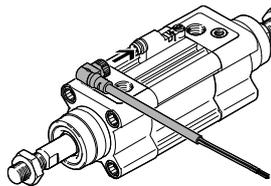

A special type of connector is the rotatable type: this enables the cable outlet of an angled socket to be rotated by 360° in 15° increments.

Advantage:  
This enables optimum positioning of the cable outlet in tight installation spaces.  
The connectors are not designed for repeatedly changing the outlet direction.

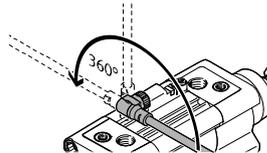

## Mounting

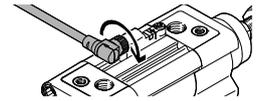

Note the orientation of the pins.

Place the socket on the plug.

Adjust the cable outlet.

Tighten the union nut.

Cable diameter [mm]	4.5
Nominal conductor cross section [mm <sup>2</sup> ]	0.25
Cable characteristics	Standard
Cable test conditions	Resistance to bending: to Festo standard Test conditions on request Energy chain: 5 million cycles, bending radius 75 mm

Technical data			
Operating voltage range [V]	0 ... 60 DC	0 ... 60 AC	
Acceptable current load [A]	3		
Surge resistance [kV]	1.5		
Protection class to EN 60529	IP65, IP67		

Materials	
Wire colour	Blue, brown, black
Housing colour	Black
Cable sheath colour	Grey
Housing	TPE-U(PU)
Insulating sheath	PVC
Cable sheath	TPE-U(PU)
Note on materials	RoHS-compliant

Operating and environmental conditions		
Ambient temperature [°C]	-25 ... +70	
Ambient temperature with flexible cable installation [°C]	-5 ... +70	
CE marking (see declaration of conformity)	In accordance with EU Low Voltage Directive	
Degree of contamination	3

# Connecting cables, clip, 4-pin

Technical data

**Connecting cable  
SIM-K**

- Plug socket with cable for connecting inputs/outputs
- Pre-assembled
- Cable lengths 2.5 m and 5 m
- 4 wires
- Mounting via clip
