

Dräger X-plore® 9000 Full Face Mask

The Dräger X-plore® 9000 supplied air system is designed for light duty industrial applications that require an independent air supply. This modular system provides comfortable and reliable respiratory protection in accordance with EN 14594:05.

Breathing hose

- For connection to hoods, helmets, visors, half masks and full face masks

Compressed air connection

- For connection to an industrial compressed air source
- 10 m long
- Available as standard version or spiral version

Control valve

- Manually adjustable
- The air flow can be adjusted from 170 to 400 l/min based on the individual needs

Filter station (optional)

- Connection of two device users is possible
- Removes particles, deposits (e.g. oil mist) and unpleasant smells
- Improves the air quality from industrial compressed air sources

ST-127588-2007

ST-36511-2003

Benefits

Versatile combination options

For the most varied applications there is a large program of Dräger X-plore® helmet, hoods and visors as well as half- and full-face masks available. The system has been tested and approved in accordance with EN 14594:05.

Individual adaptation of the air supply

During deployment the user can adjust the air supply via a control valve at the belt unit between 170 and 400 l/min and thereby adjust it to their individual requirements.

Optionally insertable filter station

The system is rounded off with an optional filter station to which two device wearers can be connected. This removes particles, and mixtures such as oil mist and annoying odours from industrial compressed air and thus clearly improves the quality of the inhaled air.

Respiratory protection independent of the ambient air

The belt-worn set Dräger X-plore 9000 is connected via a 10m long standard or spiral pneumatic hose to an on-site supply of breathing air (e.g. a compressed air mains). This breathable air is then conducted via a breathing hose to the connected Dräger X-plore® head unit.

High level of wearing comfort

The X-plore 9000 excels by its low noise emission and low weight (200 g). This permits safe working for longer periods with a high level of wearing comfort.

Dräger X-plore® 6570

The Dräger X-plore® 6570 is the high comfort silicone full face mask used by professionals in a wide variety of applications. It meets the highest demands for quality, reliability, secure fit and comfort. This full face mask is the successor to the Panorama Nova masks, a range which has proven itself over decades of use worldwide.

ST-7497-2005

Dräger X-plore® 6300

The Dräger X-plore® 6300 is the efficient yet low-cost full face breathing mask intended for price-conscious users not wishing to compromise on comfort or quality. This full face mask is the successor to the Panorama Nova Standard, a mask which has proven itself over decades of use worldwide—redesigned and improved with fresh colours and an integrated bar code.

ST-7495-2005

Dräger X-plore® 6530

The Dräger X-plore® 6530 is the most widely used full face mask from professionals in a wide variety of applications. It meets the highest demands for quality, reliability, secure fit and comfort. This full face mask is the successor to the Panorama Nova masks, a range which has proven itself over decades of use worldwide.
